

It is with great pleasure that we announce that, in cooperation with our partners Genevac and ThalesNano, we have organized a Seminar Tour in Switzerland for the week October 15-19. Purpose of the Seminar is to communicate innovative solutions, instruments & applications now available for Laboratories focusing on Pharmaceutical Research and Analysis.

This 3-hour Seminar will dwell on the development of **Continuous Flow Reactor Technology** and **Evaporation Sample Preparation Instruments**, including the development of **applications for Research, Process and Pre-formulation activity**.

#### **Seminar Presentation Program .**

- **The new versatility concept of ThalesNano Instruments for Flow Chemistry**  
Dario Brancaleoni, Product Manager Stepbio S.r.l. (I)
- **Industrial Applications of Flow Chemistry. Novel Heterocycle Synthesis and Making dangerous Chemistry Safer!**  
Ildiko Kovacs, Product Manager ThalesNano (HU)
- **Genevac set new standard for Evaporation and Fast LYO under centrifugation**  
Ake Carlsson, Genevac (U.K.)
- **How to concentrate/evaporate HPLC Fraction safely and faster: THE ROCKET**  
Stefano Giovanninetti, CEO Stepbio S.r.l. (I)
- **New Application proposal of EZ2 Elite vacuum centrifuge system for the solid state studies**  
Bernard Schneider, RPD Tool AG (CH)

The Seminar's Book, containing the Abstracts of these presentations as well as the lecturers' profile, will be released to attendees.

**Lectures will be held in English.**
